Get Rid of Weeds and Grass

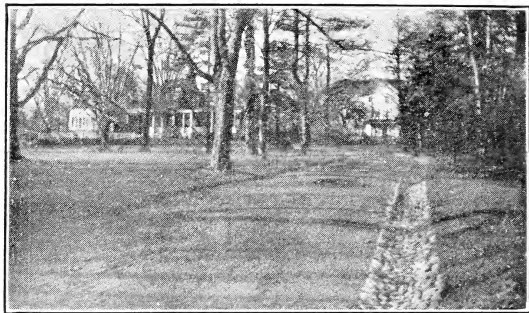

*On Paths, Drives, Cobble Gutters
Tennis Courts, etc.*

"HERBICIDE"

THE WEED EXTERMINATOR

One Application Kills Both Tops and Roots

WEEDS and grass destroy the beauty of roadways, paths and gutters, and to attempt to keep down these weeds by pulling them or cutting off the tops with hoes is an endless task, because live roots remain in the ground to furnish new tops in a week or two. The roots must be killed if these weeds are to be wiped out.

“HERBICIDE” The Weed Exterminator is a powerful chemical solution for destroying undesirable vegetation of all kinds. It is shipped in concentrated liquid form, so that each gallon may be diluted with forty gallons of water. When sprinkled on the ground with a sprinkling can, cart or wagon, it destroys not only the tops but also the roots of the weeds. One application lasts for an entire growing

season and does the work of many hand weedings.

BEING a liquid, "HERBICIDE" is used to great advantage on brick pavements and cobble gutters, for it works into the crevices, and gets at the roots. Furthermore, when weeds are destroyed by the "HERBICIDE" method, the surface of the ground is not disturbed, and this is especially desirable in the case of tennis courts.

"HERBICIDE" is the original chemical weed killer, and it is recognized as the most powerful and effective chemical for the purpose. It contains no acid and does not harm or stain stone, wood or metal. Remember, there is only one "HERBICIDE", this being the product of the Reade Manufacturing Company.

“HERBICIDE”

The Weed Exterminator

Gets rid of weeds the
permanent way.
Is quickly and
easily applied
